

Field Technician/Construction Inspector

As a **Field Technician/Construction Inspector** for Alliance Consulting, Inc. (Alliance), you'll be part of a highly trained and experienced team that performs observations and testing during earthwork and building construction of various projects. Your projects will range from impoundment sites, well pads, compressor stations, landslide repairs, pipeline inspections, roadway, and pavement and foundation inspections. Your main responsibilities will include:

- Communication with Company Project Manager while on project sites.
- Daily field report writing, reading and interpreting project drawings and specifications, and entering data related to the various job tasks.
- Interact with construction site personnel, engineers and state and federal representatives while presenting yourself as a professional representative of the company.
- Perform field testing of soils, concrete, aggregates, and asphalt to determine compliance with project specifications.
- Perform field tests using specialized equipment designed to collect data from the various construction materials, i.e.; nuclear density gauge, penetrometer, and hand tools. You will be required to keep equipment clean and in good working order.
- Driving and maintaining the appearance and operation of company vehicles to and from job sites.

Essential Functions

Provide construction management support, including inspection and monitoring of construction structures to ensure compliance with safety and environmental regulations. Fully engage in solving complex problems to provide technical evaluation and sound solutions. Ability to communicate effectively across different platforms with project management, clients, stakeholders, and contractors. Interface with clients, state and federal agencies, and other engineering disciplines on construction projects. Recordkeeping and reporting as required.

Work Experience

Zero (0) to Four (4) years of relevant experience in materials, standards, and specifications related to state highway projects and facilities. Excellent verbal and written communication skills. Capable of working independently on small construction projects. Ability to pass Criminal History Background Check (CHBC). Acceptable driving record

Preferred Skills and Experience

Inspection experience including roadway, asphalt, concrete, pavement markings, structure and bridge construction methods WVDOT and/or WVDOH (West Virginia Department of Highways) Material Certifications are a plus (Asphalt, Compaction, Concrete , Pavement Marking , Soils , Intermediate Traffic Control Certified , etc.) TRET (West Virginia Transportation Engineering Technician) certification

While related experience and prior certifications (ACI, AWS, ICC, NICET, NRCA, etc.) are **desirable**, we are also willing to provide **company-paid training** to help expand your skills in order to ensure full success in this role.

REQUIREMENTS:

- Ability to interpret project plans and specifications.
- Valid driver's license and satisfactory driving record.
- Participation in a pre-employment drug screening and background check.
- Ability to lift and/or move up to 60-80 pounds (soil and concrete samples, nuclear gauges, etc.).
- Effective verbal and written communication skills.
- Ability to perform basic mathematical procedures and use measurement tools.

Alliance offers excellent potential for career advancement and professional growth. We also offer attractive compensation packages commensurate with experience and a comprehensive benefits package including: Paid time off, health, dental, vision, life and disability insurances, matching 401(k) plan, paid holidays and much more!
